NMIT/AI&DS/colloquium/2026/09

Date: 04-02-2026

CIRCULAR

The monthly colloquium of AI&DS Department for the month of **February** is scheduled on **19/02/2026**. All the faculty members and students are cordially invited to attend the same. The details are as follows:

Topic: "Smart Farming: Role of AI in Modern Agriculture"

Speaker: Mrs. Rajeshwari Patil, Assistant Professor, Dept. of AI & DS NMIT.

Time: 3:00-4:00 PM

Venue: Room No 413, Dept. of AI & DS, NMIT.

Abstract:

Agriculture is the backbone of many economies, yet it faces significant challenges such as climate change, water scarcity, pest infestations, and the need to feed a rapidly growing population. Traditional farming methods, which rely heavily on manual labor and experience-based decision-making, are often inefficient in addressing these issues. Smart farming, powered by Artificial Intelligence (AI), offers a modern solution by enabling data-driven, precise, and sustainable agricultural practices. Smart farming integrates **Artificial Intelligence (AI)** with agriculture to make farming more **efficient, data-driven, and sustainable**. By using machine learning, sensors, drones, and computer vision, AI helps farmers monitor crops, predict yields, detect diseases early, optimize irrigation, and reduce resource wastage. This approach transforms traditional farming into **precision agriculture**, improving productivity while lowering costs and environmental impact—especially crucial for food security and climate resilience.
